**2019**

## DNA SEXING and DISEASE DETECTION

The sex determination by DNA-analysis based on PCR-method is a modern, exact, quick, reliable and non-invasive alternative. The method is also suitable for examination of nestlings, in which the sex organs are not still developed. This method can be also used for determination of sex on shell membrane immediately after hatching of the chick. The test can be performed to an individual of any age and at any time of the year. We provide the results by regular mail, by email, by phone, after the payment by bank transfer (Tatra banka IBAN: SK55 1100 0000 0026 2625 2786, BIC (SWIFT): TATRSKBX) or Paypal (wait for Paypal invoice).

The prices of analysis from dry blood spots or feathers depends on numbers of sent samples and are following:

**The prices listed in the table are per one sample:**

Number of the samples	Price per sample (analysis within 10 working days)	Price per sample (analysis within 4 working days)	Communication via email or personally	
			Price per sample (analysis within 10 working days)	Price per sample (analysis within 4 working days)
Sexing 1 - 5	9,0 €	13,5 €	8,0 €	11,5 €
Sexing 6-10	8,5 €	13,0 €	7,5 €	11,0 €
Sexing over than 10	8,0 €	12,5 €	7,0 €	10,5 €
PBFD	15,0 €	20,0 €	13,0 €	18,0 €
PBFD+APV	23,0 €	-	22,0 €	-
PBFD + sexing	20,0 €	29,5 €	18,0 €	27,5 €
PBFD+APV+sexing	28,0 €	-	27,0 €	-
PBFD + APV + Ch. psittaci	41,0 €	-	39 €	-
Certificate	1,0 €	1,0 €	1,0 €	1,0 €
Yellow protocol	Free of charge	Free of charge	Free of charge	Free of charge

**Communication via email or personally – means: The invoice and result sent only via email**

**Personally – means: at the office of the laboratory**

### INSTRUCTIONS:

If you are interested in a test, please contact us at the address above, or write an email to: bielikova@slovgen.sk. We will send you an order form and sampling cards. In the order form: fill your name, address, e-mail, species of the bird - Latin name, sample identification (ring or chip), if you wish to receive a certificate or a free protocol. The free protocol is a yellow A5 protocol for each bird separately.

For the **blood** spot analysis:

It is necessary to write the Latin name of the bird, the ID - ring number or chip of the sample. Let fall a drop of blood to a marked circle on the right upper corner of the sampling card (at least half a circle, sufficiently intense). Let it dry at the room temperature and send it together with the order form to the lab.

Make you sure:

- - you let fall a drop of blood only from one bird to a sampling card
- - let the sampling card to dry separately

If you wish to send **feather**: The feather must be a **fresh pulled out (4 – 6 pcs)**, with the feather root, inserted to the plastic or paper bag. The bag must be labeled by the bird ID. Put the feathers only from one bird to the bag. Each bird has to have its own labeled bag.

No information regarding the customer as well as purpose and results of the analysis will be provided to third parties
